

unique

Unique is the under-counter dispenser that combines advanced functionality with a compact design. It dispenses chilled, sparkling, and hot water—ideal for home and office.

The unit is provided with an internal CO₂ cylinder – 425 grams for sparkling water and a BWT MyAQUA Perfect Taste filter, ensuring fresh, clean, great-tasting and mineralized water at all times.

Thanks to its connection with the Watnext App, Unique gives you full control directly from your smartphone: monitoring the status of filter and CO₂ cylinder, adjusting temperature and flow, giving access to a range of smart features for a more efficient and personalized experience.

You can pair Unique with three dispensing solutions:

- The **Unique Mixer**, featuring the Knob using led lights that change colours depending on the selected water type.
- The **Neo Mixer**, with an intuitive keypad
- **Watdrop**, featuring a base with a shape of a drop which can be in stainless steel or methacrylate black or white. It is equipped with the Knob using led lights that change colours depending on the selected water type

With Unique, water is just the way you want it—filtered, mineralized, at the right temperature, and always under control.
